

Please Read

This Package Includes Different Folders with Promotional Material.

Here's a quick description of them.

1. Cheatsheet: Here you can find some related affiliate offers that you can use in your promos (in your e-mail broadcasts, autoresponders etc)

2. Autoresponders: This folder includes 7 autoresponders that you can use to build a relationship with your list.

To use these Autoresponders, you need an AR service (like Aweber, Getresponder or others).

3. Lead Magnet Website: This folder includes the following pages...

Index.html: The main lead magnet page. download.html: This is the download page.

Below you'll find some quick instructions that will help you to setup this "Lead Magnet Website".

Actions Required:

Step 1: The first step is to know beforehand, where you'll be uploading this Lead magnet website. It can be your root domain (example: something.com), or a sub-folder of one of your domains (example: something.com/tubebacklinkbuilder).

Comment: It's recommended to rename the download page. If you do it, please preserve its extension (.html).

Step 2: You Need to Get Your Opt-In For Code From Your Autoresponder Provider (Aweber, GetResponse etc) and add it to "index.html" (you can open and edit this file with Notepad or any other editor).

Step 3: You need to go to your Autoresponder Provider and add the lead magnet download page url (example: something.com/tubebacklinkbuilder/download.html) under its settings (in general they have a field called "Thank You Page Url" or similar), so your subscribers are redirected to this download page once they submit the opt-in form (if you don't know how to do this, please contact your AR provider).

Step 4: Upload the whole content of the "Lead Magnet Website" folder to your website.

Please also remember to upload TubeBacklinkBuilderSetup2.3.msi to your website.

4. Banners: This folder includes banners that you can use to promote the lead magnet website on different pages.

5. Videos: This folder includes a copy of the video that's used in the lead magnet of the page. You get 2 copies of them: one branded and another one unbranded.

That's All!
